ABOUT ME

I have experience with web & ad designs, product designs and copywriting as well. Currently, I'm improving my knowledge of Python, HTML, CSS, JavaScript and some other tools.

I strive to create websites and designs that are user-friendly, accessible, and visually appealing.

If you're looking for a designer, website manager or even a copywriter who is reliable, experienced, and passionate about creating beautiful and functional websites & designs, then I'm the perfect fit for your project.

Feel free to reach out and get in touch!.

Python | HTML & CSS | Basic JavaSript | Bootstrap 5

PROJECTS

[10/01/2021 – Current] **Thrace Tactical Gear (e-commerce)**

This is an online e-commerce store built with WIX. It is the biggest project that I have made.All the design, placements and colors have been done or chosen by me. I have also done all the marketing myself. (Facebook & Google ads.)

[2022 – 2022] Cafe & Wifi

This is a website for rating different cafe places that you have visited. It has an SQLite database for all the users and the cafés they have submitted. This project was built with Flask, Python, Bootstrap, HTML, CSS and some custom JavaScript. The website also automatically detects the geolocation of the cafe provided with a Google Maps API.

[2022 – 2022] Kanban TODO

This is something I am very proud of. It is fully functioning kanban board building website. You can drag and drop, edit and create different Kanban cards. All of which have a dedicated progress bar. Built with Flask Python, HTML, CSS, Custom JS and Bootstrap 5.
